# Prompt per le immagini

Questo file contiene i prompt per generare tutte le immagini del gioco. I prompt sono in **inglese**, perché i generatori (Midjourney, Flux, SDXL, DALL·E, Imagen, Firefly) seguono meglio l'inglese. Le note intorno sono in italiano. Nel PDF e nell'HTML ogni prompt è già completo: contiene stile, formato, epoca, divieto di testo e negativo, e non serve aggiungere niente. Questo file `.md` è la sorgente, con i blocchi comuni scritti una volta sola.

Salva ogni immagine riuscita nella cartella `finali/` **con il nome indicato** accanto al titolo di ogni prompt. Le prove scartate vanno in `bozze/`. Questo file esiste anche in versione `PROMPTS.html`, con un pulsante «Copia» per ogni prompt: è quella da aprire sul cellulare. Quando sono pronte, mandamele e le inserisco in schede e PDF.

### Negativo (da incollare nel campo «negative prompt»)

```

```

captions, watermark, logo, brand monogram, neon sign with words, OPEN sign, signature, modern smartphone, flat-screen TV, modern car, deformed hands, extra fingers, asymmetrical eyes, duplicate faces, stock photo smile, postcard beach, daylight, cheerful tourist mood

## Stato dei lavori

Tutte le 52 immagini sono fatte e sono in `finali/`; le versioni per la stampa sono in `stampa/` (JPEG, 1200 px). I prompt restano sotto, nel caso vogliate rigenerarne una. Gli originali scartati stanno in `bozze/`.

Dai ritratti già generati sono usciti quattro difetti, e i prompt che restano li evitano:

- **Logo o monogramma** su borse e vestiti (era sulla borsa di Pua).
- **Scritte nelle insegne al neon**, a volte «OPEN» o caratteri finti.
- Il colore dei capelli può scostarsi dal prompt: controlla sempre che corrisponda alla scheda.

- Il testo dei tesserini e dei badge esce sfocato: va bene, lo copro in impaginazione.

## Prima di cominciare

### Le tre regole che valgono per tutto

1. **Niente testo nell'immagine, neanche sulle insegne.** I generatori sbagliano le scritte e tendono a mettere «OPEN» o lettere finte sul neon: nei prompt le insegne sono tubi luminosi astratti, senza parole né simboli, e niente marchi su borse, bottiglie o vestiti. Dove un foglio, una lettera o un display deve «contenere» del testo, il prompt chiede una pagina con scrittura **illeggibile e sfocata**. Il testo vero (nei file `indizi/` e `oggetti/`) si aggiunge dopo, in impaginazione. Unica eccezione: la copertina.
2. **Nessun volto deve tradire il colpevole.** Tutti i ritratti hanno la stessa espressione: neutra, riservata, un po' sulla difensiva. Non generare sguardi colpevoli, sorrisi cattivi, ombre sinistre o mani

nascoste, su Maleko come su chiunque altro, e niente di troppo rilassato o «innocente».

3. **Una sola epoca.** Honolulu, agosto 2004: niente smartphone, niente schermi piatti, niente auto moderne, niente auricolari. Telefoni a conchiglia, compatte digitali da 4 megapixel, registratori a microcassetta.

### Cosa è deciso e cosa no

Costumi e accessori vengono dalle schede, e i giocatori li usano per riconoscersi: non cambiarli. **Etnia, tratti del volto e colore dei capelli non sono scritti nelle schede.** Seguono la composizione reale delle Hawaii: nel 2004 la maggior parte degli abitanti è di origine mista (hawaiana, giapponese, filippina, cinese, portoghese, samoana, bianca) e il locale è pieno di «local». Ogni personaggio ha quindi un'origine mista precisa. Se vuoi altro, cambia quelle parole e lascia il resto.

### Blocchi comuni (da incollare dove indicato)

**[STYLE]** (in coda a ogni prompt)

> cinematic still, tropical neo-noir, Honolulu Waikiki 2004, shot on 35mm film (Kodak Vision3 500T look), 50mm lens, shallow depth of field, available light only, deep contrast, hot pink neon (#FF6FAE) and teal neon (#0F6B6B) glow from abstract neon tubes with no words or symbols, reflecting on dark koa wood, humid haze, fine film grain, muted but saturated colors, no text, no letters, no logos, no watermark, no frame, no border

**[NEG]** (campo «negative prompt»; se non c'è, accoda «avoid: …»)

> cartoon, illustration, anime, 3D render, plastic skin, oversmoothed skin, airbrushed, text, letters, captions, watermark, logo, brand monogram, neon sign with words, OPEN sign, signature, modern smartphone, flat-screen TV, modern car, deformed hands, extra fingers, asymmetrical eyes, duplicate faces, stock photo smile, postcard beach, daylight, cheerful tourist mood

**[PORTRAIT]** (per tutti i ritratti)

> waist-up portrait, vertical 3:4, neutral guarded expression with the mouth closed, face in sharp focus, soft pink and teal neon light on the face, background out of focus

**[OBJECT]** (per tutti gli oggetti di scena)

> top-down shot slightly tilted by 15 degrees, horizontal 4:3, single subject centered, dark koa wood table or aged paper surface, one soft light from the upper left plus faint neon glow on the edge, deep shadows, no hands in the frame unless specified

### Formati

- **Ritratti:** verticale 3:4, almeno 1024×1365 px.
- **Oggetti e indizi:** orizzontale 4:3, almeno 1600×1200 px.
- **Luoghi:** orizzontale 16:9, almeno 1920×1080 px.
- **Copertina:** verticale 2:3, almeno 1600×2400 px.

### Come tenere i volti diversi

Il rischio è che i generatori facciano lo stesso volto per tutti. Per evitarlo:

- **Ogni ritratto in una chat nuova.** Non usare il ritratto di un personaggio come

riferimento per un altro, nemmeno tra fratelli.

- **Ogni prompt ha già i suoi tratti**: forma del viso, carnagione, naso, occhi, capelli, corporatura, angolo di ripresa. Non toglierli e non accorciarli.
- **Se due volti vengono simili**, rigenera il secondo scrivendo in testa «this person must look clearly different from a [descrizione del primo]».
- **Somiglianza tra fratelli: un solo tratto.** Mahoe (Akoni, Pua, Ike): le palpebre pesanti. Hanohano (Maleko, Kalea): le sopracciglia dritte e scure. Basta questo.
- **Per tenere lo stesso volto dello stesso personaggio**, usa il suo ritratto come riferimento solo per le immagini in cui compare lui (le tre foto di Noe, per esempio).

HAIR: thin black hair greying at the sides under a hat. CLOTHES: faded aloha shirt, a thin tie, a straw hat, a small notebook and a pencil in the hand. Patient eyes. Camera at eye level, hat brim casting a light shadow. Background: the nightclub with the lights turned off, only a thin pink neon line from the door. cinematic still, tropical neo-noir, Honolulu Waikiki 2004, shot on 35mm film (Kodak Vision3 500T look), 50mm lens, shallow depth of field, available light only, deep contrast, hot pink neon (#FF6FAE) and teal neon (#0F6B6B) glow from abstract neon tubes with no words or symbols, reflecting on dark koa wood, humid haze, fine film grain, muted but saturated colors, no text, no letters, no logos, no watermark, no frame, no border. Image format: vertical 3:4, at least 1024x1365 px. Setting: Honolulu, August 2004: no smartphones, no flat screens, no modern cars, no earbuds. No readable text, letters or numbers anywhere in the image: any paper, label or screen shows only blurred, illegible

marks. Neutral, guarded, slightly defensive expression: no guilty look, no sinister smile, no hidden hands, no dramatic shadows across the face. This must be a unique, individual face, clearly different from every other portrait in the series: follow the face, skin, hair and body details above exactly. Only if a reference image of this same character is attached, keep exactly that person. Avoid: cartoon, illustration, anime, 3D render, plastic skin, oversmoothed skin, airbrushed, text, letters, captions, watermark, logo, brand monogram, neon sign with words, OPEN sign, signature, modern smartphone, flat-screen TV, modern car, deformed hands, extra fingers, asymmetrical eyes, duplicate faces, stock photo smile, postcard beach, daylight, cheerful tourist mood.

## Le tre foto della macchina di Noe (indizi 06 e 26)

Sono immagini **di gioco**: i giocatori le guardano e ci ragionano. Conta la composizione, non l'estetica. Stile diverso dal resto: **sembrano scatti di una compatta digitale del 2004**, con flash diretto, 4 megapixel, colori un po' slavati, rumore digitale, nessuna profondità di

campo. Non usare [STYLE] qui. Se serve la data stampata in arancione in basso a destra, aggiungila dopo in impaginazione ( `'04 8 14 23:12` , ecc.).

I personaggi si inseriscono con i **ritratti già generati come immagini di riferimento**. Li numeri a parole nel prompt («image 1 is Akoni…») e li carichi nello stesso ordine. Se i volti si mescolano, genera la scena con due persone e aggiungi gli altri uno alla volta con il comando di modifica («add the man from image 3 at the right end, keep everything else unchanged»), oppure incolla i personaggi in un editor gratuito e chiedi all'IA di fonderli in una sola foto a flash. Controlla sempre il numero delle persone.

**Prima di generare:** Carica nell'ordine, nello stesso messaggio: ritratto 04 (Akoni), 05 (Pua), 06 (Maleko), 10 (Auntie Lei). I volti devono essere riconoscibili.

> Image 1 is Akoni, image 2 is Pua, image 3 is Maleko, image 4 is Auntie Lei. Keep each person's face, hair and clothes identical to their

reference image. Lighting and look: a 2004 compact digital camera with direct flash, slightly washed colors and mild noise, not cinematic. Amateur flash photo of a veranda at night with wicker chairs and a glass door behind. Four people around a low table: Akoni (image 1, light linen suit, pale blue shirt, silver hair) standing at the left, looking down at a flip phone; Pua (image 2, turquoise skirt suit, white plumeria lei) standing next to him; Auntie Lei (image 4, floral muumuu, purple orchid lei, white bun, thick glasses, koa cane) seated; Maleko (image 3, faded flower-print aloha shirt, khaki trousers) seated at the end. Exactly four people, no one else. In the foreground one wicker chair is empty, with a half-full glass of white wine on the small table beside it. No text, no date stamp. Image format: horizontal 4:3, at least 1600x1200 px. Setting: Honolulu, August 2004: no smartphones, no flat screens, no modern cars, no earbuds. `foto_IMG_0413.png`

**Prima di generare:** Carica nell'ordine: ritratto 04 (Akoni), 05 (Pua), 10 (Auntie Lei). Qui i volti contano poco: sono di profilo o lontani, bastano i vestiti. Falla per prima, è la più facile.

Image 1 is Akoni, image 2 is Pua, image 3 is Auntie Lei: use them only for clothes, hair and build, since faces are small, in profile or in shadow. Amateur photo taken with a 2004 compact digital camera, flash off, available neon light, slightly blurry, as if taken in a hurry. Shot from a dark veranda looking inward through a large glass door into a nightclub hall at the exact moment a burst of confetti and colored streamers explodes in the air inside, stage lights, a few blurred guests. On the left edge of the frame, in profile on a side staircase leading down to the beach, Akoni (image 1, light linen suit, silver hair) with a flip phone pressed against his ear. In the center, close to the glass door, Pua (image 2, turquoise suit), and next to her Auntie Lei (image 3, white hair, floral

muumuu, cane) seated in a wicker chair. Exactly three people in the frame plus the blurred guests inside. At the very bottom edge of the frame, the tip of a pair of dark shoes (the photographer's). No text, no date stamp. Image format: horizontal 4:3, at least 1600x1200 px. Setting: Honolulu, August 2004: no smartphones, no flat screens, no modern cars, no earbuds. No readable text, letters or numbers anywhere in the image: any paper, label or screen shows only blurred, illegible marks. Avoid: cartoon, illustration, anime, 3D render, plastic skin, oversmoothed skin, airbrushed, text, letters, captions, watermark, logo, brand monogram, neon sign with words, OPEN sign, signature, modern smartphone, flat-screen TV, modern car, deformed hands, extra fingers, asymmetrical eyes, duplicate faces, stock photo smile, postcard beach, daylight, cheerful tourist mood.

Se hai poco tempo: genera solo le **tre foto** e la **copertina**: i ritratti ci sono già. Il resto aggiunge atmosfera ma non cambia la partita.

## Come lavorare con i piani gratuiti di ChatGPT e Gemini

### Le cartelle

```
immagini/
  PROMPTS.md       questo file
  PROMPTS.html     la stessa cosa, per il cellu
  finali/          le immagini scelte, con il r
  bozze/           tutto il resto, senza fretta
```

Quando una bozza è quella buona, la copi in `finali/` col nome giusto. Il nome è l'unica cosa che mi serve per inserirla in schede e PDF.

### Il metodo

1. **Un giorno, un gruppo.** I piani gratuiti concedono poche immagini al giorno, e i limiti cambiano senza preavviso: controllali nell'app. Procedi per priorità, non per numero. Ritratti già fatti. Giorno 1: le tre foto di Noe e la copertina. Giorno 2: gli

indizi 16–30. Giorno 3: gli oggetti 31–40. Poi piatti e luoghi, quando vuoi.

2. **Un personaggio, una conversazione.** Genera il ritratto, tienilo aperto e per le immagini successive dello stesso personaggio (le foto di Noe, per esempio) scrivi «stessa persona di questa immagine» e incolla il prompt nuovo. È il modo più economico per tenere il volto coerente senza strumenti a pagamento.
3. **Le famiglie non si fanno in sequenza.** Ogni fratello ha la sua chat nuova: la somiglianza è già nel prompt, in un solo tratto.
4. **Le tre foto di Noe sono le più difficili**, perché i generatori sbagliano il numero di persone. Tira 3–4 tentativi per ognuna e scegli quella con le persone giuste, anche se è meno bella. Conta la composizione.
5. **Se compare del testo**, rigenera una volta con «no text, no letters». Se resta, lo copro io in impaginazione.
6. **Per gli oggetti puoi usare la fotocamera**: una busta, una chiave, una

scatola di sigari veri, fotografati di sera con una lampada, costano meno di un'immagine generata e non sbagliano le dita. Per le carte indizio col testo è anche la soluzione più pulita.

7. **Stesso strumento per le tre foto.** Per le foto di Noe usa lo strumento con cui hai fatto i ritratti, e caricali come immagini di riferimento: 04 Akoni, 05 Pua, 06 Maleko, 10 Auntie Lei, nell'ordine scritto sopra ogni prompt.
